

## Elicitation Workshop

13/02/2024 [ 12:30 pm to 2:30 pm]

### Meeting Attendees-

- 1) Rahman Mehmood
- 2) Suhaibuddin Ahmed
- 3) Kamalini Ponnuru
- 4) Andre Sharp
- 5) Varun Mahankali
- 6) Shashank Varma
- 7) Madi McCauley
- 8) Usama Bin Faheem

### Discussion:

We had two meetings scheduled during this workshop. One was with the other groups and the other one was with our group.

During the first meeting with the other groups that is Tiny Coders and Tech Explorers, we asked questions and gave suggestions from an end user perspective to Tech Explorers. They gave us comprehensive answers and took our suggestions in a positive manner.

Similarly, we were then asked questions and given suggestions by Tiny Coders. We tried to give our best explanation to them and have accepted all their suggestions.

At the end of this meeting, we further decided to collaborate with each other because our projects were similar in few aspects.

Later, we had another meeting with our group where we discussed all the suggestions and noted them down in a brief report which was submitted on Canvas along with the recordings. We ended our meeting by deciding to meet again this week to complete our Requirement Analysis for the project and to get on track to complete Deliverable 2.

The summary of the interaction of the team with Tech Explorers and Tiny Coders are as follows:

1. **Purpose of the application:** We have highlighted features unique to our application, have given them different scenarios where the application can be used that is the portal provides you an avenue to network with a closed group which can make the users experience more personalized compared to other social platforms.

2. **More Functionalities:** Once the basic application is developed, we will explore other enhancements we can add to the application. We are exploring features to publish events like meet and greet, and probably have these events based on zip codes.
3. **Chat Feature:** Suggestion Accepted- We have included it as an optional requirement for our application.
4. **Authentication of Users:** We discussed the options that involve authentication based on the domain names of the University.
5. **Future collaboration:** Since the three groups have a similar kind of application we have decided to share our experiences and findings as we move forward.

We have decided to accept all the suggestions that we received from the elicitation workshop. We did have a few features included in our optional requirements and we will make an effort to have these features in our final deliverable.
